LET'S USE WOVEN FABRIC

Once you are satisfied with the fit of your knit top, you can NOW use woven fabric. **MAKE A NEW PATTERN AND MARK IT WOVEN.** Add $\frac{1}{2}$ " TO 2" to the side seam and $\frac{1}{2}$ ' to 2' to center front depending on the style you are making. Whatever you added to the side seam, add to the sleeve seam as well. Follow the illustration to broaden back.

Add $\frac{1}{2}$ " to 2"
in center front
depending on
style you have
chosen.

If you are full
busted—start
out adding 2"
to center front
and “tweak”
(remove)
accordingly.

HOW TO DETERMINE YARDAGE

This is an easy way to determine yardage. What are you going to make? A simple pullover with no sleeves? 3/4 sleeves? A dress? Measure from the center of your shoulder down to whatever length you desire and then from the end of your shoulder to however long you want your sleeves. You will need one or two **body lengths** plus one **sleeve length** plus and extra 4-5 inches for hems. On 45" wide fabric, you will need two body lengths plus your sleeve length. On 60" wide fabric, most can use one body length plus sleeve length plus 4-5 inches for hems. When choosing the dolman sleeve look, you need 2 body lengths of 60" wide fabric plus extra for hems!
